To Whom It May Concern:

I am writing to let you know how pleased our office is with the service we have received from Kevin. When we decided it was time to replace our copier (that we purchased through your company many years ago), Kevin worked with our office to help us select a copier that would meet our needs and he was very patient, kind and helpful in answering our questions.

Once the new copier was installed, Kevin was here to show us how it worked, and he entered the appropriate settings that worked best with our office needs. He made the transition from using our old copier to the new one seamless. Kevin also stopped by our office shortly thereafter to see if we had any further questions and to make sure everything was still running smoothly.

Soon after the new copier was installed, we purchased a new computer to be used in conjunction with the new copier for the purpose of acquiring scanned documents. Our computer technology company had trouble setting up a driver for the new computer to communicate correctly with the copier and our software (which was no fault of Budget Document Technology). When we called Kevin to tell him about the issue, he immediately worked with our computer technology company to get things up and running smoothly again. In my opinion, Kevin went above and beyond what was expected of him.

We have been very pleased with Kevin's responsiveness and expertise, and we would highly recommend Kevin and Budget Document Technology to any business in need of a new copier!

Sincerely,

Sandra Warner  
Office Manager
